

Editor's comment :

Article requires the followings:

- 1- Restructuring the research methodology.
- 2- Adding more literature review to support objectives, problem statement, and results.

Author's feedback :

The editor's comment is quit appreciated, and corrections have been made in that respect by the author. It will be appreciated if responds (feedback) as regards **2018/AJEBA/41455** are communicated to the author through this e-mail address <amaraokoye20@gmail.com>

Note: My name is Okoye Amara, a lecturer at The Department of Accountancy, University of Nigeria Enugu Campus. I sent a manuscript (**2018/AJEBA/41455**) titled The Effect of Cashless Banking on unemployment rate in Nigeria to SCIENCEDOMAIN international for publication in the Asian Journal of Economics, Business and Accounting (including 18,000.00 Nigerian currency) through Mary-Fidelis Abiahu <f.abiahu@unizik.edu.ng>. The corrected revised manuscript and the author's feedback were sent from Okoye Amara < amaraokoye20@gmail.com > as a result of loss in contact between Okoye, A and Abiahu Mary-Fidelis; as well as to meet up with the deadline for April edition.

Sorry for disclosing names (Okoye, A and Abiahu Mary-Fidelis)in this feedback; it is just for more clarifications.
