

SDI Review Form 1.6

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_31221
Title of the Manuscript:	Physicochemical characterization of palm mill oil effluent and bioremediation of impacted soil using a consortium of microorganisms and biostimulation
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The author mention in title bioremediation, to prove it the authors should be analysis the waste before and after treatments bio stimulation of what	Around our locality, the effect of POME is widespread as it is already and plants cannot grow on soils where they are usually dumped. Thus, our aim from the start was to see how we restore such impacted soil back to support plant grow. Yes, we did not carry our physicochemical characterization at the end of the experiment because we had assumed that if it can support growth, then it is restored.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
