SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Title: as has not been assessed native areas can not use the term (soil diversity) never ever. Evaluation in only two moments is not a problem as described in the article Statistical analysis needs to be more in depth ... to observe if there were differences between the abundances in each area (a simple test of Tukey) Without the average test, it is not inferior in the conclusions.	This comment is not clear to the author. I think the title of the paper is properly written I agreed, The statistical tools used in the research is adequate for the manuscript. Same as above.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
