| <b><u>Compulsory</u></b> REVISION comments | The links between the characteristics of the population, their energy consumption behavior and the improved of ICS is poor and must be clearly demonstrate.                                                                                                                                                                                                          | The links between the characteristics of the population, their energy consumption behaviour and the improved of ICS was clearly demonstrated in the analysis for determinants of ICS use in the study area.                                                 |
| <b><u>Minor</u></b> REVISION comments      | <p>The length of the paper is too short</p> <p>The list of references is incomplete relative to the references cited in the manuscript.</p> <p>\</p>                                                                                                                                                                                                                 | <p>Can you please I identify were can be improved on to make the volume of the paper increase?</p> <p>I still believe that the cited references were all represented in the reference sector.</p>                                                           |
| <b><u>Optional/General</u></b> comments    | <p>The idea of a socio-economic analysis is good and interesting.</p> <p>"ICS use constraints in Enugu state" is not described in this paper. Only the solutions are given.</p> <p>(line99); (L142), ENADEP(L182), NPC (L187), L211</p> <p><b>Keywords" No write Health because your title is focus on improving of cookstoves, so no need to write "Health"</b></p> | <p>The ICS use constraints in Enugu state was fully described in the Constraints faced by households in the use of ICS in Enugu state section using a mean score rating to identify these constraints.</p> <p>Health has been removed from the keywords</p> |
