

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_31855
Title of the Manuscript:	PLANT GENETIC RESOURCES (PGR) IN NIGERIA AND THE REALITY OF CLIMATE CHANGE - A REVIEW
Type of Article:	Minireview paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
There remain several instances of grammatical errors or awkward sentence structure throughout the revised paper. Although I do appreciate the author's attempts to address the issues raised in the first review, there are several areas where these corrections were more than acceptable and others where work can still be done. In terms of references and supporting their arguments, I think there is still room for improvement and I would have liked to have seen the introduction cut significantly so that it is more focused on Nigeria. The global review of climate change seems inappropriate in this context. Overall, I feel as though the paper could still be trimmed and focused more to really highlight the points the author is trying to make.
