SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. There is no evidence of community participation in conservation elsewhere in the introduction and discussion 2. There are no bar charts as mentioned in the methodology 3. In-depth interviews are used to evaluate policy. In most cases this involves an assessment of impact of policy: how successful has it been in achieving its intended goals and what have been the unintended consequences. There is no information on the Policy on Conservation and how the IDI must have been used to show weakness or non- implementation. The discussion in section 5.5 is very poor I will recommend that the author rework the research to interface actual policy implementation and community participation. Also provide evidence of this kinds of study in many other places	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
