

SDI Review Form 1.6

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_35287
Title of the Manuscript:	Temporal and spatial distribution of sulfate reducing bacteria in shrimp culture pond sediment
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	a. When the distribution of SRB was studied simultaneously the influence on culture could also have been taken in to account by studying its impact on 1. Growth rate 2. Food conversion ratio 3. Protein conversion ratio b. What could have been the other causes of turbidity? c. If we are talking about the waste being a source then at what % body weight were the shrimps being fed. If an apt amount is calculated it reduces the waste d. Was the amount of faeces too high that it influenced the water quality? e. Then the digestibility of the ingredients fed should have been looked into. For it is inversely related to the generation of waste.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Otherwise the determination of SRB is satisfactory
