Manuscript Number:	Ms_AJEE_37021
Title of the Manuscript:	Highly Efficient Treatment Of Shrimp Farm Wastewater By Using The Horizontal Subsurface flow (HSSF) Constructed Wetlands With Phragmites australis Plant
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article is interesting but some clarifications are necessary: - More recent references in the first part of the Introduction; - The quality indicators legislation values must be presented; - A plants evaluation description during and after application should be made (growth, size...); - Installation efficiency should be verified without plants. It is possible to obtain interesting performance without plants and also the comparison is interesting. - The numbering of the reference list.	
Minor REVISION comments
