

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_40224
Title of the Manuscript:	APPLICATION OF GEOSPATIAL TECHNOLOGIES IN ASSESSING GULLY EROSION IN THE HUMID TROPICS OF ENIONG OFFOT, UYO, AKWA IBOM STATE
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. the objectives are still insufficient for a research paper 2. the tasks are part of the work methodology 3. the author presents in results an image processing (NDVI) for which the explanation is necessary 4. Image processing software uses specific statistical methods to analyze different landscapes for images classification, this is fundamental to understand the results 5. the explanation of the methodology is fundamental in a scientific work, with more reason when it is of geotechnologies application, because the results are only understood if the application is correctly done 6. it is unacceptable to start the results with a figure.	1. The issue regarding the objectives are corrected. 2. The key method applied in the study are discussed under the research methodology and materials as shown in subheading 3 3. Similarly, the flaw of starting the result with figure have been corrected
