PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	- Paper should follows the standard format : abstract, back ground, literature review, methodology, results and discussion, conclusion. - There is no main problem, and what is the purpose of this research. - Metodhology : variable and data analysis unclear	- The research article was prepared as per the standard format given in author guideline section. - The Kilpura-Khatima-Surai wildlife corridor has been severely disturbed due to encroachment by the communities over the last few decades. The purpose of this study was to understand the encroachment history of Devipura-Mjahgaon village as well as the pattern of human-wildlife conflict during wildlife movement through the newly established human settlement. The purpose of this study was to identify conservation actions to prevent increasing encroachment as well as to mitigate HWC issues. - The survey was based on personal interview (structured questionnaire) and Focused Group Discussion. A total of 105 respondents were interviewed including male and female members from the village. The respondent wee asked questions on average landholding, crops grown and productivity, HWC, extent of damage to crops in each season, loss of property, livestock depredation, and human injury or mortality among the households, and the measures used by the households to mitigate the HWC impacts.
Minor REVISION comments	Figure and table should fact fanding based, and it need to be elaborate more in accordance with the topic	The suggestions would be incorporated in the final manuscript.
Optional/General comments
