Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The paper is well written and clearly described. However I may suggest to describe in Results the kind of plant species. It seems that most are herbs (ephemerals) some shrubs and only four trees that have basal area? Please clarify. Also it is highly recommended to describe deeper the soil analysis by including the type of analysis done for the soil parameters. What means st/ha? Shoot? Describe within text or table legend.	This has been clarified in the corrected manuscript
Optional/General comments
