PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Changes which must be made 1. Please include more justification of how this paper is original- there are numerous alternative fuels (biodiesel) and ethanol production studies available. 2. Provide a comparison with other production methods of ethanol in the literature. 3. Mathematical model and governing equations shall be explained in more detail. 4. The literature review is weak. Need to include more recent works, as from year 2010, related to the research direction. The author should explicitly include some of the results obtained in the introduction section as well. 5. All figures need to be enhanced in quality as well as clearance.
