

SDI Review Form 1.6

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_35489
Title of the Manuscript:	An exploratory study of adoption of Brazilian-based model for ethanol production and diffusion of cassava ethanol in Nigeria
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Figures 1, 4, 5 and 6: The data sources that originated these figures are very old (ten years or more!). This compromises the whole analysis of the information contained in the text. Authors should look for more current data sources.	
Minor REVISION comments	At the beginning of the text: Write the molecular formulas correctly, using the numbers in subscript format. Throughout the text: (i) Correct punctuation and formatting problems, such as, for example, lines 108, 183, 184. (ii) Incorrect use of capitalized words in the middle of sentences. Line 486: Excuse me, but this definition of pathogen is ridiculous (tiny living things).	
Optional/General comments	Generally speaking, it's a good paper. However, out-of-date data sources compromise the quality of information. I strongly recommend updating the sources.
