SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The introduction contains and important and sensitive information but lacks proper referencing, the author should provide the references to all the cited statements for easy reproducibility. Last paragraph LINE 97-100; reference Line 131-132: reference LINE 155: Reference also In fact almost all the “attributes of innovations” requires suitable referencing. LINE 185: the word “overcome” should be “overcomed” Reference : adoption category, and if its the same with “figure 2” it should be stated again SOURCE for Table 1 COMMA; between the word “market” and “the govt” REFERENCE; last paragraph on the section 5.3. as the info is highly sensitive and significant	
Minor REVISION comments	The first statement from the abstract lacks good punctuation, it will be great if the author will effect the punctuations well. LINE 50 the word “reduce” should be past tense ‘reduced” Figure 5 is obviously outdated, i.e 2007, If there is possibility, the author should provide the recent publication on Nigeria’s oil production and consumption up to date.	
Optional/General comments	Though optional, I believe it will be better if the author will reconsider putting the figures immediately after their respective literature discussion
