PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This paper has substance, and is well-written. However, there are grammatical, typographical and other errors worthy of revising before acceptance. And, these are as follows: #1 On the abstract I strongly suggest that it should be written in the present tense. #2 On grammatical errors 1.Spelling errors Line 23-Hydrogemorphology Line127-gentile=gentle Line 167 – Accptble=Accptable Line 186 –indicted=indicated Line 146- 1.21indicated-spacing #3 Check Line 121-prepared for=prepared in Line 172- provided on=provided below 216- use 'adequate or enough' #4 Check your use of capital letters for Line 50 – Physicochemical, Biological Line 111-Temperature #5 Need to be hyphenated Line 13,47-sociocultural Line 22- interrelationship Line 37,50,109,166,171,- physicochemical Line 50-aforementioned Line 80, 82,151-fluid mud Lies 106,110, 111- onsite #6 There are omissions in Line 8-Adamawa State, Nigeria	

	Line 11- Results revealed that the Line154- ...Mbenum; as suggested by Line 159-infested with littorals Line 204- properties such as #7 wrong use of apostrophe 's' Your language style/syntax is British. This does not allow the use of apostrophe 's' with inanimate objects like 'lake'. See lines 73, 91, 95, 113, 130, 142, 146, 151, 182, 203. #8 On your citation style Line 108- This does not agree with your style in the introduction section. #9 Check Table 1, S/NO 7. You mean the maximum depth of the lake is 1.48 m, which is 4.44 feet. Is this realistic. I tend to disagree #9 On the reference style Your reference style is inconsistent. Compare No [3] and [12] with others	
Minor REVISION comments		
Optional/General comments
