FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The title of the first column of the table is missing. In fact I even tried to add columns to help you complete, but you do not understand. The title of a table corresponds to the first row and the first column (Ex: for your 1st table: characteristics of communities) As for the references in the conclusion section, the reasons given by the author for not deleting them are not convincing. Conclusion should not be discuss Conclusion: it is not a review manuscript, which can have many figures and tables and does not meet the standards of a research article. As far as I'm concerned, to maintain the quality of this journal, this manuscript cannot be published in this state
