

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_43545
Title of the Manuscript:	Enumeration of total heterotrophic bacteria counts and petroleum degrading bacteria counts in water and sediments from Diobu Creek, Port Harcourt, Nigeria
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have now looked over this manuscript (manuscript number Ms_AJEE_43545) three times, and the fact is that it still reads like a rough draft. There are missing details about the methods, questionable methods, and lots of typos and grammatical errors. The temperature in which the incubations were done has changed in all three drafts, which makes me question whether the authors know what temperature they used. This is a problem. I don't think the manuscript is significantly improved from the first time I reviewed it, and regretfully, I must therefore recommend that it be rejected for publication in your journal. In the end, this decision is up to the managing editor, of course, but I personally cannot support publication of this report.
