

Editor's Comment:

- This manuscript presents a huge list of spelling mistakes.
- Manuscript still require revision.
- The references must be arranged in standard format:
- The specific name must start with a lower-case letter (*Lablab Purpureus*)
- Species names should be written in full at first, but for later mentions, the genus name can be abbreviated e.g. *Heterobranchus bidorsalis* can be written *H. bidorsalis*.
- Spaces should be inserted between numbers and units (08:00hrs, 2mm) and between numbers and mathematical symbols (\pm , \times , $=$, $<$) but not between numbers and percent symbols (45%)
- Unnecessary information should be avoided (e.g. five (5), three (3))

Editor's Details:

Dr. Elif Ipek Cengiz
Professor, Department of Pharmaceutical Toxicology, Faculty of Pharmacy, Dicle University, Turkey
