

Editor's Comment:

Considering the manuscript "FLOATING AND STABILITY EFFECT ON FISH FEED PELLETS USING DIFFERENT CONCENTRATION OF BAOBAB (*Adansonia digitata*), LEAVE MEAL.", initially rejected, by a reviewer, but with minor and major revision by two other reviewers, with an acceptance and a demand for revision, respectively. In addition, issues were made by the authors. Again requested review by a reviewer again. Forwarded by the authors, abiding by my thinking. In this regard, considering the greater proportion of manuscript acceptance, I recommend the publication of the manuscript.
