PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The paper reads much better. However, there are minor but important issues to correct before publication as follows: 1 In the current revised document which I shall attach, the author has introduced numbers after quotations where we also have reference numbers. All such numbers should be deleted from the paper and only leave those corresponding to the numbering in the reference section. Example. a. The current line 7 has (Young, 44-45) [5] b. Current line 335 ."probably not get a cent from him' 218 [4]. 2. Current line 97-99 should be one sentence 3. References should have page numbers and even the website where they were sourced indicated. Books should have the name of the publisher. Currently they look incomplete.
