PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Gram negative microorganisms such as <i>Escherichia coli</i> , <i>Proteus</i> and <i>Klebsiella</i> are naturally resistant to vancomycin and methicillin due to the properties of their wall. I recommend not doing studies on these antibiotics	Noted. The focus is shifted to multi drug resistant bacteria as modified in the topic. Others antibiotics are also used in this study.
<u>Minor</u> REVISION comments	On line 371 there is a space that should not be	Noted. Modified as appropriate. Thank you for your review
<u>Optional/General</u> comments
