SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This is a well written study about phpt. I have some suggestions. 1- Please shorten the title. 2-Did you use only t test? 3- "Hyperparathyroidism may be due to paraneoplastic syndromes at various conditions"(Surg Laparosc Endosc Percutan Tech. 2017 Mar 13. doi: 10.1097/SLE.0000000000000389.) and (World J Surg. 2017 May;41(5):1259-1266. doi: 10.1007/s00268-016-3858-6) I suggest both of these uptodate studies for the references.	1. The title has been slightly adjusted 2. yes I used t test because it is valid for this study. 3. Thank you for these references. However I could not add them because I could not get the articles.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
