PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Abstract: the abstract is redundant. Detail of histologic variations should be mentioned only in the introduction. Light should be focused only on fibrolipomas - Please use technical terminology. For example, change "mucosa over the growth" to "overlying mucosa" - Please omit figures 3 and 4 because they are non-informative. However, higher magnification –power photomicrographs are required to show the juncture between the fibrous and lipoatous components of the lesion. Photomicrographs must be of high-quality. - In page 5, please delete the beginner-level definitions of the histologic variants of lipoma (lines 105-119)	Thank you for your valuable comments review members. I have obliged to your comments and done the needful corrections as stated.
Minor REVISION comments	- The manuscript requires extensive editing.	
Optional/General comments
