SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Which sentences are true "Surgical site infection (SSI) is the second most common infectious complication" (Page 1, line 9) or "Surgical site infections (SSI) are the third most common hospital-acquired infections (HAI)" (Page 2, line 38)? 2. I do not understand the reason why the blood clot may provide a medium for bacterial growth and as a result cause post-operative surgical site infection? I cannot find any explanation in reference (Dhar et al., 2014). 3. Staphylococcus aureus and Pseudomonas aeruginosa are virulent bacteria compared with other Staphylococcus spp. and Pseudomonas spp. Authors should demonstrate this differences in Table 4.	
Minor REVISION comments	Page 1, line 14; Page 2, line 68: What is "O and G"? Page 4, line 133: What is "37OC"? Page 7, line 205; line 214; These contents should be described in Result section.	
Optional/General comments
