

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_31284
Title of the Manuscript:	Surgical wound infections in Obstetrics and Gynecology ward in Specialist Hospital Sokoto – North West Nigeria
New Title:	Aerobic bacteria from surgical wound infections in Obstetrics and Gynecology ward in Specialist Hospital Sokoto – North West Nigeria
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
In this revised manuscript, author did not respond appropriately to my previous comments. I raised my previous comments again. 2. I do not understand the reason why the blood clot may provide a medium for bacterial growth and as a result cause post-operative surgical site infection? I cannot find any explanation in reference (Dhar et al., 2014). 3. Staphylococcus aureus and Pseudomonas aeruginosa are virulent bacteria compared with other Staphylococcus spp. and Pseudomonas spp. Authors should demonstrate this difference in Table 4. Finally, authors should carefully deal with the reviewer's comments.
