**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	The manuscript number Ms_AJMAH_41595 presents interesting data, but considering that they are derived from a single analysis can be considered preliminary, other observations are necessary by integrating the cohort of subjects analyzed including the microelement dosage also in other body fluids such as urine, faeces and saliva. It is also advisable to evaluate the effects of the treatment of exposed subjects with microelements supplements The text presents parts with different fonts, deriving from parts of other texts copied and pasted. The bibliography does not contain recent data. There are many typos in the text.	-Limitations and recommendation of the study is stated to address the issues . -References are updated and manuscript revised
