

SDI Review Form 1.6

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_41263
Title of the Manuscript:	Adult Onset Stills Disease: Not so Uncommon Cause of Fever of Unknown Origin.
Type of the Article	Case Study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	(1) The title had better change to "A case of adult-onset Still's disease: not an uncommon cause of fever of unknown origin". Or it looks like a review article. (2) The disease name "AOSD" is derived from the abbreviation of "adult-onset Still's disease". The entirely name should be unified in title and text. (3) High serum titer of ferritin (>1000 ng/ml) has been regarded as the abnormal laboratory finding in patients with AOSD. However, this patient showed normal serum ferritin levels. The authors should explain the possible reason for it in "Discussion". (4) May typing and grammatical errors are found everywhere in text. English-editing by an experienced person is requested to improve the writing.	
<u>Minor</u> REVISION comments	No	
<u>Optional/General</u> comments
