PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Many thanks for authors for al explanation about study area, but there is no need for this part as a result all study duration was finished in three months. I think you must delete this part (study area) and put this sentence (The study area for this research is Sokoto State) with in next paragraph (Study Setting).</p> <p>Why you added this part (Calculation of Sample Size). This is many details which supposed to be in the end or in supplementary data</p>	<p>The correction has been effected as observed.</p> <p>On the sample size calculation, I had to include because one of the receivers demanded details of how the sample size was determined. Actually, I know is not necessary inside the work. Thanks.</p>
