Title of the Manuscript:	SEROPREVALENCE OF HIV, HBV and HCV AMONG PRISONERS IN SOKOTO, NIGERIA
Type of Article:	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The work improves in important ways in several aspects, above all it indicates that in order to have more precise results, tests such as PCR and ELISA should be used in order to be certain of which individuals are infected and their reflections also seem to me adequate.	Thanks and we are working towards that to use more sensitive and specific methods like ELISA and PCR to carry out the study as soon as the fund is available.
