

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_44902
Title of the Manuscript:	Haemoglobin Genotype, ABO and Rhesus Blood Group Distribution in Briggs Family of Abonnema, Rivers State, Nigeria
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors faithfully reacted to my suggestions and incorporated all my advice into this version, which improved the manuscript greatly. Now the discussion point has become clearer: the new findings were that in this family there were no cases of RhD (-) or Hb SS genotype. The authors emphasized this point and thus this paper becomes better. Please edit language at the editorial side. The paper is too long only to show this simple result.	<p>The paper seems to be long but please lets permit it so. This will enable those who are not medical professionals to really understand the subject matter as it is a study carried out on a particular kindred and so needed for better understanding.</p> <p>Thanks</p>
