PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<ol style="list-style-type: none"> 1. In Introduction, authors described "In Mexico, the prevalence...". However, HBV is a critical problem in Asia country, how about the relationship between obesity and hepatitis virus in Asia? 2. In addition to correlate the hepatitis virus with WC, BMI and WHR. Actually, physiological value, such as blood pressure, cholesterol, are also critical parameters related to obesity. 	Thanks to the professional advices from the review committee, 1.For the Reviewer's comment, we added some literature in the introduction. 2.In this study, the blood pressure, cholesterol blood sugar and other health examination data are incomplete and blood sugar health examination data are incomplete. Obesity indicators are also considered related to them, and there may be collinearity issues. Therefore, the analysis only performed correction analysis on BMI, waist circumference, and waist-height ratio.
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
