**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>This appears to be a much improved paper. However, I would like authors to respond these few concerns before manuscript can be considered for publication.</p> <ol style="list-style-type: none"> <li><b>Under study design:</b> It will benefit the quality of the manuscript if authors clarify why they selected the descriptive cross-sectional design? And justify why it is useful for this study.</li> <li><b>Discussion:</b> This section has to be placed in wider literature. Specifically, consider discussing how your findings or results confirm or contradict previous study. The entire discussion section has to be reconsidered.</li> <li><b>Recommendation:</b> I suggest you write the points in paragraphs and place it before the conclusion. The conclusion should be the last section.</li> <li><b>References:</b> Both in-text and reference list has to be reconsidered and structured according to the journal accepted reference style. Guideline on the accepted reference style for this journal can be found here: <a href="http://www.sciencedomain.org/journal/48/authors-instruction">http://www.sciencedomain.org/journal/48/authors-instruction</a>.</li> <li><b>Language:</b> Grammar and punctuation errors have to be considered and improved before manuscript can be considered for publication.</li> </ol>
