PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Sample size estimation not clearly mentioned. Anticipated/ previous Prevalence used for final sample size calculation not mentioned. 2. The author has used snow ball sampling technique for recruiting study participants. Typically in a snow ball method, one WP user will recruit one or more WP users and so on. Thus finally all selected subjects will be WP users. So how was prevalence of WP use estimated in the study? If done otherwise kindly elaborate the sampling technique used. 3. Only one variable (nationality) was found to be statistically significant, so why was multiple logistic regression done?	
Minor REVISION comments	In Table 2- sociodemographic profile, nationality is divided into 3 groups, but analysis done in two groups only in subsequent tables.	
Optional/General comments
