

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_45602
Title of the Manuscript:	PREVALENCE OF WATER-PIPE SMOKING AND ITS ASSOCIATED FACTORS AMONG ARAB STUDENTS IN MALAYSIA
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Table 4 needs to be deleted as only one variable was statistically significant, so no need of multiple logistic regression to calculate adjusted OR 2. Table 6 depicts Simple logistic regression OR, but title of table mentions multiple logistic regression (this needs to be changed). Better mention crude OR or OR in place of simple logistic regression OR in the table. 3. Also table 7 needs to be deleted as here also only one variable is statistically significant, so no need of multiple logistic regression and calculation of adjusted odds ratio. 4. Finally, since multiple logistic regression cannot be carried out in the analysis, better not to use simple logistic regression term. You can use term "association"
