PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	It would be interesting to compare de presence of microalbuminuria in patients with and without diabetes mellitus respectively, because as we know patients with DM are more likely to developed MAU. I suggest it for future studies. How did you assess LVH? Based on ECG or due to echo cardio graphic assessment of left ventricular mass index. Just mention it in the text.	We will take this in consideration. Thanks. Correction was done. We mentioned that LVH was assessed by ECG.
<u>Optional/General</u> comments
