PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
-Some changes still need to be addressed (I have marked them in RED colour) -Figure 3 needs chart title, titles to the X and Y axes -The pathophysiology of septal abscess as mentioned in the article(main cause-trauma) but still needs clarity as to why chronic rhinosinusitis(CRS) can cause septal abscess considering this article shows 66% patients had CRS - Title needs to be addressed since the data consists of both septal abscess and septal haematoma cases
