

SDI Review Form 1.6

Journal Name:	Asian Journal of Biology
Manuscript Number:	Ms_AJOB_34533
Title of the Manuscript:	Assesment of phenology and morphological diversity of 3 species of Asteraceae : Anacyclus clavatus, Chamaemelum fuscatum and Leucanthemum parthenium
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>Original scientific article should solve any scientific problem. So first of all the Authors are expected to indicate a problem, its importance and afterwards to phrase the research questions or hypothesis. Here the Authors should explain why they wanted to compare these 3 species in terms of phenology and morphological diversity. And the reader find no explanation.</p> <p>For studying morphological diversity, the sample of 10 individuals per species is definitely insufficient.</p> <p>For phenological studies it is correct but here the Authors should add meteorological data for the studied area. I would advise to focus on phenology – if the 3 species are cultivated or used for medicinal purposes the phonological data might be relevant.</p>	<p>In this study, the authors wanted to compare these 3 species of Asteraceae (<i>Anacyclus clavatus</i>, <i>Chamaemelum fuscum</i> and <i>Leucanthemum parthenium</i>) in terms of phenology and morphological diversity because they have a wide range of uses in medicine and were characterized by inter-specific variations.</p> <p>For studying morphological diversity, we can only collected 10 individuals per species.</p>
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
