PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. The introduction section is scanty and looks too elementary; the author should get publications on this topic to get more information. 2. Also, no discussion of the results. The author should discuss the results in relation to the previous works done on this topic, not necessarily on the plant species that the author worked on. 3. Grammatical errors should be corrected. 4. There is nothing like "epidermal leaf study", the author should correct this in the text. 5. The author did not make reference to figure 1 in the text, this should be effected. Other highlighted text in the manuscript should be corrected accordingly.	
Minor REVISION comments		
Optional/General comments	Author is advised to check these publications for more information: 1. Sharaibi et al (2017).Micromorphological Characterization of the Leaf and Rhizome of Agapanthus praecox subsp. Praecox. 2. Ohikena et al. (2016) Micromorphological Studies in Loranthaceae 3. Ogundola et al. (2017). Morphological Assessment of Roots, Stems and Leaves of Solanum nigrum.
