**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"> <li>The literature on haemoparasites in Nigeria is shallow. Please beef up.</li> <li>Even a more recent work on haemoparasitic diseases carried out by Sam-Wobo <i>et al.</i>, 2016 in Abeokuta Ogun State Nigeria wasn't even cited.</li> <li>Was this research done strictly on a particular breed or different breeds? Because there seemed to be a further description on the Zebu Breed, so I ask if all the 105 cattle are of the same breed IF SO then I suggest the name of the breed could reflect in the title and also featured in the Keywords.</li> <li>The justification I feel should also be broadened a little.</li> <li>In the Discussion, Has there been other reported works on haemoparasitic diseases in the State? IF SO, then it should be cited. BUT IF NONE, then this could act as a baseline data for subsequent further researches to be built on.</li> <li>The references are inconsistent. Please take note. Follow the author's guide of the Journal.</li> </ul>	<p>Thanks for the Reviewer s corrections. Both authours agree to this and we shall forward the corrected version.</p> <ul style="list-style-type: none"> <li>A line on Babesiosis has been added.</li> <li>Sam-Wobo <i>et al.</i>, has been added.</li> <li>Yes strictly on Sokoto gudali breed.</li> <li>Justification left as it ieel otherwise.</li> <li>No such report in the State to the best of our knowledge.</li> <li>References effected. Author s guide followed.</li> </ul>
<b>Minor</b> REVISION comments	<p>Figure 1 – Readjust the figure itself. The title of the figure overlaps the word 'location'.</p> <p>The viewing of the slides at the Laboratory, was it cross-checked again by another technologist to avoid mis-interpretation?</p>	Yes it was cross checked
<b>Optional/General</b> comments
