

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#">Asian Journal of Biology</a>
Manuscript Number:	Ms_AJOB_38202
Title of the Manuscript:	Hepatoprotective effect of ginseng, green tea, cinnamon their combination against acetamiprid - induced oxidative stress in rats
Type of Article:	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>1) I think the author should write in methods: divide animals into 6 group: group Control; group Acetamiprid recover; group Acetamiprid + ginseng; group Acetamiprid + green tea; group Acetamiprid + cinnamon; group Acetamiprid + Mixture</p> <p>2) Some sentence the author should use name of author instead of [number reference] such as <b>Also [28]</b> reported...</p> <p>3) the symbol of statistic different are still not clear. Author should be symbol *,# for presents the significant differences. Author should compare other group with group Control and group Acetamiprid recover only. I don't understand about the: A, B, C, D, E Means with a common superscript within a row are significantly different at (P&lt;0.05).; a, b Means with a common subscript within a column are significantly different at (P&lt;0.05).</p> <p>4) The dose of extract for animals should be written.</p>
