

SDI Review Form 1.6

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_35519
Title of the Manuscript:	Study on synthesis and characterization of hexaquonickel(II) bis-p-toluenesulfonate
Type of the Article	Original research papers

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1) Line No 15-18: For Four Lines There Is 26 References Given ,Make It Proper References One To Four Only</p> <p>2) Line No 74: Equation Is Not Proper Or It Is Not Balanced. To correct the equation.</p> <p>3) Line 127-140: no any parameter and calculation of hkl values Lot of revision is required</p>	<p>Thank you very much for your useful advice, We have carefully revised this problem according to your comments. A point-by-point response to the concerns is described as following:</p> <p>1) We have appropriately reduced the amount of references in line No 15-18.</p> <p>2) We are so sorry for our mistakes, and we have correct the equation.</p> <p>3) Interplanar crystal spacing and hkl values of $\text{Ni}(\text{OTs})_2 \cdot 6\text{H}_2\text{O}$ and $\text{Ni}(\text{OTs})_2$ are added in Table 2 and Table 3.</p>
Minor REVISION comments		
Optional/General comments
