

SDI FINAL EVALUATION FORM 1.1

PART 1:

| | |
|--------------------------|--|
| Journal Name: | Asian Journal of Chemical Sciences |
| Manuscript Number: | Ms_AJOCS_36885 |
| Title of the Manuscript: | Treatments of Recycled Pulps from Old Corrugated Containers. Part I. The Effects of Boron Compounds on Optical and Physical Properties |
| Type of Article: | Original Research Article |

PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any) | Authors' response to final evaluator's comments |
|--|--|
| <p>1- If there are compulsory study submitted to this journal or other journals the authors need to mention that in the current study. Besides I still insist to add discussion for your results and discussion part (why the title is results and discussion).</p> <p>2- Again, I'm wondering for not responding for changing the table format. The authors need to check other published works. The first two horizontal lines and the last line of the table has to be visible while it is must not contained any visible vertical lines.</p> <p>3- Many sentences in the results part are not clear or understandable the authors need to check the English and descriptions precisely. for example: "However, the paper gloss is a visual impression that is caused when a paper surface is evaluated" and do not cause important level color reduction." "to note that increasing boric acid concentration from 5.0% to 10% and recycling number negative impact on color of test" thought sentences are not clear "As can be seen the use of sodium borohydride has not clear effects": Grammar mistake." Please revise all paper English not only the mentioned parts.</p> | <ol style="list-style-type: none"> 1. In research journal formats, it is usually preferred to use Result and Discussions section together in order to summarize research work and follow literature findings together. 2. I have already check manuscript. All Tables vertical and horizontal lines visible. 3. Thanks to reviewer, the phrase rewritten. Thereby, the sentence of '.....the paper gloss is a visual impression that is caused when a paper surface is evaluated'. has been removed from text. <p>The word of somewhat added to phrase '...number somewhat negative ...' .</p> <p>The sentence of 'As can be seen the' has modified as 'It can be seen....'</p> <p>The English language of manuscript carefully edited. and 2 new references cited and added to reference lists. (ref. 16 and 17).</p> <p>I have tried improve manuscript as much as I can. It is a part of project. Hereby I have separately summarize and prepare research papers. Each of these manuscripts have their own characteristics. Part I is only deal physical properties of papers. Part II is only deals with strength properties of papers. I think both manuscript has enough literature information, and experimental results. I hope those manuscript accepted.</p> |
