Compulsory REVISION comments	This manuscript gives the results of recycled fibers treatment by boron compounds and its influence on strength properties of papers. English stylistics and grammar is very poor, the text contains many errors. This fact greatly limits the scientific value of the article. The shortcomings are marked in the manuscript. In the introduction, knowledge basis is not actual. All cited literature sources are very old and three references are coming from this century.	<p>The manuscript has carefully edited for improving English language.
