

SDI Review Form 1.6

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_35519
Title of the Manuscript:	Study on synthesis and characterization of hexaquonickel(II) bis-p-toluenesulfonate
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The Authors report the synthesis of Hexaquonickel (II) bis- <i>p</i> -toluenesulfonate [Ni(OTs) ₂ ·6H ₂ O] from the reaction of <i>p</i> -toluenesulfonic acid (PTS) and nickel hydroxide [Ni(OH) ₂]. And they characterize the product using Energy disperse spectroscopy, thermal-analysis instrument, infrared spectrometer, and X-ray diffractometer. The influence of equivalence ratio of reactants [NPTS/MNi(OH) ₂], reaction temperature and reaction time on the yield of products was investigated. The only comment on the minor corrections in English language.	
Minor REVISION comments		
Optional/General comments
