

SDI Review Form 1.6

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_41250
Title of the Manuscript:	Validation of the AlereTM Methamphetamine Microplate ELISA for the detection of Methamphetamine in oral fluid
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	You have written drug is banned, which is not true, but yes its use by sports person is banned. What is NIDA Explain? Through some light on 10 samples (inclusion criteria, method of collection from drug abusers). Write physical properties of drug , like melting and boiling points as well as stability studies (thermal, Acidic, basic, oxidative). Elaborate and compare, estimation of drug by ELISA vs GC-MS by graphs.	The written statement on drug ban has been Corrected NIDA is National Institute of Drug Abuse and has been corrected as highlighted line 39. The samples were obtained from the sample bank of Biosciences laboratory, Department of Biosciences and Chemistry, Sheffield Hallam University, UK. Detailed in line 89-96 Drug physical properties and stability has been provided as highlighted in the manuscript Graph comparing ELISA and GC-MS has been incorporated in Figure 2.
Minor REVISION comments		
Optional/General comments
