

SDI Review Form 1.6

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_46013
Title of the Manuscript:	Kinetics of the esterification reaction between adipic acid and 1,6-hexanediol with tetrabutyl titanate as a catalyst
New title:	Kinetics of the esterification reaction of adipic acid with 1,6-hexanediol catalyzed by tetrabutyl titanate
Type of the Article	Original research papers

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	This paper deals with kinetics of the catalytic esterification reaction of adipic acid (AA) and 1,6-hexanediol, it is important for many polymer materials production, so I support it to be published after minor revision. 1, in all equations the subscript are not italic, only for the symbols of physical quantities. 2, number and the units must insert a space; 3, the reaction order for 1,6-hexanediol may be between 1 and 2, not exact 1.5, which may be the different between experiment data and theoretical ones in figure 5;	I have revised. I have revised. I agreed. The reaction order for 1,6-hexanediol may be approximately 1.5, while the 3.5-order model can be integrated out and fit experiment data quite well.
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
