

SDI Review Form 1.6

Journal Name:	Asian Journal of Geological Research
Manuscript Number:	Ms_AJOGER_41867
Title of the Manuscript:	Geochemical and Engineering Properties of Selected Lateritic Deposits in Akure Metropolis as Highway Subgrade Foun
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that <u>NO</u> manuscript should be rejected only on the basis of '<u>lack of Novelty'</u>, provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed highlight that part in the manu his/her feedback here)
Compulsory REVISION comments	It is not easy for a geologist unfamiliar with Nigeria to get oriented in the geologic context of these important laterite soils. Perhaps a simplified cartoon showing relationships between all these rocks units and lithological complexes to accompany Figure 2 (geologic map) will help a lot. Also, what are the ages (absolute or relative) of Migmatite Gneiss Quartzite Complex, Charnockitic rocsk, Dioritic rocks, Older Granite, unmetamorpohsed dolerite dykes?	
Minor REVISION comments		
Optional/General comments
