

Editor's Comment:

The comments are not addressed properly specially this three comments.

1. Introduction required more recent references, modification and also table for comparison with other ferrites composites and how it is better? **Table is missing in revised file**
2. Temperature is important parameters and it affect dielectric properties, temperature dependence dielectric constant and dissipation factor study is missing. Please add that data and cite some relevant references: Physica B 510 (2017) 74–79, Phys. Chem. Chem. Phys., 2017, 19, 210-218, IEEE Transactions on Dielectrics and Electrical Insulation Vol. 19, No. 1; February 2012, J. Phys. Chem. C, 2016, 120 (10), pp 5682–5693. **Please cite the above mentioned references and mentioned that temperature vs dielectric properties is our next plan or future aspects**
3. Please include error bar in Fig. 5-----**Missing in revised version**
