

SDI Review Form 1.6

Journal Name:	Asian Journal of Physical and Chemical Sciences
Manuscript Number:	Ms_AJOPACS_42490
Title of the Manuscript:	Degradation of Dyes from Industrial Effluents using an Ultrasonic Bath in the Presence and Absence of Various Inorganic Salts and
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>1. Author has claimed that degradation rate for methylene blue is $MB + H_2O_2 > MB + Na_2CO_3$ and so on and for methyl orange it is $MO + Na_2SO_4 > MO + NaNO_3$. No explanation is given for such order.</p> <p>2. Why was degradation order changed in the case of MO? It should also mentioned in the text with the help of suitable mechanism.</p> <p>3. Synergistic effect of H_2O_2 and additives should be incorporated in the discussion part.</p> <p>4. Latest references from 2014 to 2018 should be incorporated.</p>	
Optional/General comments
