

SDI Review Form 1.6

Journal Name:	Asian Journal of Probability and Statistics
Manuscript Number:	Ms_AJPAS_42676
Title of the Manuscript:	Generalized Euclidean Least Square Approximation
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The name of the article is "Generalized Euclidean Least Square Approximation". But it is not told how to make Generalized Euclidean Least Square Approximation in the text. As if the name of the article was "Existence and Uniqueness theorem", this section was mainly in the text. - The paper was written sloppy. for example the first example number is 5 . - the equations are not numbered.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Author give 4 examples in the text. it would be enough to give one detailed example instead of 4 examples. in this example it would be much more useful to show how the Generalized Euclidean Least Square Approximation approach would be done in detail and show how this advantage would be in relation to classical method
